**Consultation response: TAR NC Consultation, dated 30 April
2018**

28 June 2018

Dear Madam/Sir

Our ref. petbi

Thank you very much for this opportunity to give our input to the NC TAR implementation in Sweden.

Ørsted agrees with the analysis made by Swedegas on implementing NC TAR in the most suitable manner for the Swedish market. This includes the role of Dragør and considerations on how to structure the tariff methodology in a market of a relatively limited size. Further, the efforts to establish a joint balancing zone between Denmark and Sweden is an element in the considerations.

Hence, Ørsted agrees with the proposal, including the Entry/Exit split (0/100), the stamp tariff and the capacity/commodity split (100/0).

We are at your disposal for any clarifications.

Yours sincerely

Ørsted

Peter Biloft-Jensen
